Edmonton Beach News.

Acting on the report that cottages at Edmonton Beach had been entered in the absence of the owners, an investigation was made by the Police. It was found that the Donaldson cottage was the only one which had been entered. Very little was missed from this place when Mr Donaldson visited it. As there was evidence that a fire had been made by the visitors, it is thought these may have been some skaters from off the Lake.

Mr J A Barrie, the genial proprietor of this summer resort, who is at present residing in Edmonton, paid the Beach a visit on Sunday.

\$2 for Three Years

The recent announcement of the Family Herald and Weekly Star to give a year free with a two year subscription appears to us a move in the right direction. Not that the Family Herald needs to reduce its price; it is recognized that at \$1 per year it is the greatest value in Canada today. The "year free" offer therefore, means this—the subscription is still one dollar for one year, but for two dollars you receive a subscription for three years instead of two years.

Hundreds will literally leap at this big offer and well they may. When one considers that for a two dollar bill you can have a paper of the calibre of the Family Herald and Weekly Star coming to your home for three full years—it goes without saying that it is a somewhat tempting offer.

LOCAL NEWS.

Mr A. R. ("Blondy") Hall who played on the local ball team last season, was a visitor in Stony over the weekend.

Several parties from this district motored up to Lake Wabaman on Saturday, where the fishing is said to be good.

Inquiries are being made daily as to the date of the appearance here of the new Chevrolet Six. Jac Mayer, of the Service Garage, expects to have several of these on the garage floor early in the New Year.

The only really National Family Journal is the Family Herald and Weekly Star, of Montreal. It has as many readers in Nova Scotia as in Saskatchewan, and is in its new form the talk of the Dominion.

R. C. services will be held in the Town Hall on Tuesday next at 11.30 a.m.

If your eyes bother you, or you suffer from headaches, why not have your eyes attended to by an expert? M M Meeklenburg, eye specialist, 10159 101st St., Edmonton. At Royal Hotel, Stony Plain, on Friday, Dec. 28.

Look After Your Horses

Several motorists using the roads hereabouts have recently called the attention of the authorities to the menace that some horse-drawn vehicles are, owing to the negligence of the drivers. A case in point happened the other afternoon when a motorist was driving to town and met a driverless runaway team hooked to a farm wagon. The team had been left standing unattended, and, getting tired, had started for home and feedin's. Fortunately, the team kept to its own side of the road, otherwise there would have been a few motor cars requiring much-needed repairs, to be paid for by the team's owner.

Seized Farmer's Land Wrongfully.

Edmonton Journal: Judgment handed down Friday by the appellate division of the Supreme Court of Alberta in the case of James White and the municipal District of Inga awarded the appellant damages of \$3500 for the wrongful sale for taxes of his land by the municipal district.

White's action was dismissed in the trial division by Mr Justice Ford, who held that the district had complied with the regulations in regard to the sale of lands confiscated for taxes.

Geo Van Allen acted for the successful appellant.

Mr Geo. J. Bran, our local lawyer, has taken quite an interest in this case, having until recently been associated with the Van Allen law firm

A New Year's Resolution

This is the season when with Christmas thoughts of "Peace on earth, good-will toward men" still uppermost in our minds we turn our faces toward the New Year in the hope and expectation that it will prove a better, happier, more prosperous year than the one that has gone before. New Year resolutions are made, some are kept, many are broken, because man is after all very human and weak.

But there is one guiding motive in the lives of all which surely we ought to adopt and determine to keep. It will cost us nothing to do so but a little self-restraint, and it will add immeasurably to our own happiness and peace of mind, and to the peace, progress and prosperity of every local community, every province, and the Dominion as a whole. Nay more, its universal acceptance and practice would constitute a permanent guarantee of the peace of the world.

It is the essence of the Christmas message, "Peace and Good-will Toward Men;" it is the golden rule of life, doing unto others as we would that they should do unto us. It is a spirit of tolerance, of brotherhood, a recognition of the rights, even the prejudices of others, and acceptance of the fact that there are other viewpoints than those we ourselves hold and cherish.

In every community and in every country there are, unfortunately, men whose greatest ambition appears to be to nullify, stamp out, kill the spirit, the ideals, the principles which the Saviour of the world taught his disciples, and for which He bled down His life. Such individuals, having certain ends to serve, thrive for a time by stirring up strife, through the arousing of passions, prejudices, hatred, disrupting whole communities, and leaving behind them a trail of distrust, suspicion and ill-feeling where formerly concord and co-operation prevailed. These agitators, seeking self-aggrandisement or other selfish ends, pass on, but individual lives have been embittered, happy homes wrecked, communities divided, and all the old pleasant relations and amity destroyed.

It is passing strange why so many otherwise sane and intelligent people give heed to the demagogic appeals of men of this type rather than to the real leaders of their country. Why is it that men and women can be stirred to frenzy against their fellow citizens merely because they speak another language, or whose skins are of a different color, or because of birth and upbringing, have been taught to worship God through different forms to those they themselves have inherited and accepted?

Rather than be swayed by these peace-wreckers and hatred-breeders, would not Canada, and the people of Canada, and greater happiness, more real contentment, and achieve greater prosperity and attain to higher things, if, instead, they followed the leadership of Canada's real leaders, past and present?

The confederation of Canada was not accomplished by men who sought to divide the people into rival and antagonistic groups, stirring up passions and fanning the flames of racial and religious prejudice. Such men are never constructive, but always destructive. They never did, and never can build up a country. No, Confederation is the achievement of men like Sir John A. Macdonald, George Brown, Sir George Cartier, who, forgetting and submerging personal views, united and worked together successfully to unite Canadians of all classes, races, and religions into one great united Confederation.

Hon. R. B. Bennett, upon whom the mantle of Sir John Macdonald has fallen, is not preaching race and creed bitterness, but is raising his voice on all occasions for every man to be protected in his faith, in his liberty, and as far as justice is concerned to have a voice in public affairs and to be able to express his opinions on public subjects.

In the Saskatchewan Legislature recently the Minister of Public Health said: "I claim that any brand of Canadianism that does not accord equality to all its citizens, irrespective of race, creed, or place of birth is a fraud. If my country means anything to me, it means that its institutions are broad enough for every man to be protected in his faith, in his liberty, and as far as justice is concerned to have a voice in public affairs and to be able to express his opinions on public subjects."

As the carillon in the Peace Tower of the Parliament Buildings, at Ottawa, in common with bells around the world, rings out the old and rings in the new, cannot people of Canada rise far above the old suspicions and animosities of the past, and, accordingly rejecting the appeal of those who would keep their country in a turmoil, accept as eternally true the words addressed by Sir Wilfrid Laurier, shortly before his death, to a body of university students: "Truth is better than fear; faith is better than doubt; love is better than hate."

Heavy Cable Tolls

South American War Crisis Cost League Of Nations Large Sum

The South American war crisis has cost the League of Nations the biggest telegraph and cable bill in its career. The council despatched the entire official correspondence relating to the dispute between Paraguay and Bolivia to nearly sixty governments, each separate despatch consisting of five closely spaced type-written sheets. The total cost amounted to over \$6,000.

Solve Arctic Mystery

Discovery Of Two Skeletons In Siberia Throws Light On Polar Expedition

Discovery of two whitened skeletons is believed to have solved the ten-year mystery surrounding the exact fate of two members of the 1910-1912 Polar Expedition of Roald Amundsen. The skeletons were found recently in northeastern Siberia.

The men involved were named Tessem and Knudsen. Both were members of the crew of Amundsen's Polar ship, the Maud. They left the expedition at the Chukotka peninsula with letters, maps and scientific data, all of incalculable value, which Amundsen thought it desirable should reach civilization at once. Tessem and Knudsen were trying to make Port Dixton. They never arrived and nothing had been learned of them until the discovery of the skeletons.

Austria has marked the one-hundredth anniversary of the introduction of the accordion, devised in that country, to other parts of Europe.

Patten Estate

Chicago Wheat King Leaves Huge Amount To Charity

Nearly 66 per cent. of the estate of the late James A. Patten, "The Wheat King," who died recently, will eventually go to charity, the Chicago Title and Trust Company, named as executor and trustee, has revealed. The estate is estimated at \$150,000,000.

Upon the death of the widow, the estate is to be turned over by the trustee, one-fourth to the son, an equal share to his daughter, and the remaining one-half to be divided among seven charities.

TO THE MOTHERS

OF ALL PALE GIRLS

If Your Daughter Shows Signs Of Anaemia A Tonic Is Needed

Anemia is simply a lack of blood. It is one of the most common and at the same time most dangerous troubles from which growing girls suffer. It is common because the blood so often becomes impoverished during development, when girls often overwork and overstudy. It is dangerous because of the stealthiness of its approach and because of its tendency to grow steadily worse. Every growing girl should occasionally take a tonic to ward off this insidious trouble. It is because of their powerful action in rebuilding the blood that Dr. Williams' Pink Pills have made a world-wide reputation. The case of Miss Claire Sullivan, Pincher Creek, Alta., amply proves the value of this medicine. Miss Sullivan says: "During my school days I suffered a great deal from thin and watery blood. I was continually weak and tired, my appetite was poor, my sleep unrefreshing and I was troubled with backaches. To make matters worse I was attacked with acute appendicitis and the operation left me in a very weakened state. My mother, learning of the value of Dr. Williams' Pink Pills, had me take them and after using them for some time I can say the result was simply wonderful, as they completely restored my health, and now when opportunity occurs I always recommend these pills to weak, pale girls suffering as I did."

You can get the pills from your druggist, or mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Judge—"Prisoners, you are sentenced to hard labour for life."

Criminal—"Excellent! May I sit down for five minutes before I begin?"

Check Colds with Minard's Liniment

The sulphur of coal smoke will make red or blue flowers much paler, or even white.

Demand Exceeds Supply

Canada Does Not Make Enough Matches For Home Market

Canada, it would seem, ought to be a thriving industry in the making of matches. This Dominion produces a large proportion of the material required. Yet in the past fiscal year Canada imported matches to the value of \$90,985, as compared with \$35,346 the year before. These came almost entirely from Sweden, though there were also purchases made in the United Kingdom and United States. Exports during the year showed a decline of from \$18,470 to \$8,491, these going in small quantities to a great many countries. Canada is at the same time exporting match splints for the industry in other countries. The value of these to leave the country in 1927, was \$466,248, and in 1928, \$385,885. The United Kingdom is the principal importer while the Irish Free State is also an importer.

Six years ago there were four plants manufacturing matches in Canada, but through amalgamations there were but three in 1926, though the capital investment in the period had increased from \$2,108,775 to \$4,509,305. A total of 781 persons found employment in the industry, being paid the sum of \$23,754. The cost of materials used in the industry was \$1,069,685, the selling value of the products was \$1,943,795 and the value added by manufacture accordingly \$874,109.

While many of the chemicals utilized have to be imported the items of heaviest cost in manufacture are lumber, splints, containers, boxes and cartons, the material for which are native products. In view of this it would not be surprising to find a greater development in the industry. Almost the entire Canadian production is domestically consumed, export trade amounting to less than one per cent. of the output.

Cobalt Production

Cobalt produced in Canada is obtained chiefly by treating arsenical silver-cobalt-nickel residues from the Cobalt, St. Lawrence, and Gowgana silver camps in northern Ontario, though a small part of the production is obtained directly from low-silver high-cobalt ores.

Foods and Seasons

The canned food industry of Canada has effected great changes in the relation of foods to seasons. Fruits and vegetables of many kinds, with all the flavour of the freshly gathered product, are to be had in or out of season all the year round.

To Enter Canadian Banking Field

Barclay's Bank Of England Make Application To Form A Bank

Barclay's Bank Limited, one of the largest banks in England with resources of approximately \$1,800,000, is about to enter the Canadian banking field.

According to an announcement appearing in a recent issue of the Official Gazette, at the next session of parliament an application will be made to form a bank under the Canadian Bank act to be known as "Barclay's Bank (Canada)." The bank is one of the "big five" with resources as shown in the balance sheet as at the 30th of June, of approximately \$1,800,000,000.

It is understood that Sir Robert Borden will accept the office of president of the new bank.

Worms, however generated, are found in the digestive tracts, and they set up disturbances detrimental to the health of the child. There can be no comfort for the little ones until the harmful intruders have been expelled. An excellent preparation for this purpose can be had in Miller's Worm Powders. They will immediately destroy the worms and correct the conditions that were favorable to their existence.

Navigation Closed Without Any Mishap

Everything Made Safe For Winter With No Loss Reported

The winding-up of navigation on the Great Lakes and St. Lawrence River was successful, according to reports received by the department of marine and fisheries. The lower St. Lawrence all the equipment of the department, such as buoys and floating lights, were gathered into winter quarters without any losses whatever as far as could be ascertained.

All the ocean-going boats operating along the river and lakes reached the sea without encountering ice, and the lake and river boats were safely laid up for the winter.

Soft corners are difficult to eradicate, but Holloway's Corn Remover will draw them out painlessly.

An umbrella with teeth that grip the owner's sleeve has been invented. But will it snap at anybody who tries to steal it in a restaurant?

Minard's Liniment For Asthma.

Canada's Dairy Products The total value of all products of the dairy factories in Canada in 1926 was \$133,353,976.

WINDOLITE The Improved Glass Substitute

MADE IN ENGLAND

COMES WITH A MESSAGE OF HEALTH

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandas, schools, libraries, hospitals, sanatoriums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 lbs., while a square yard of glass of ordinary thickness weighs about 135 to 140 lbs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$15.00 Per Square Yard, F.O.B. Toronto.

Industry Owes a Great Debt To the Work of Scientists Who Discover Secrets of Nature

When science speaks, thinking men give heed. Not long ago as time is truly reckoned, the world was in a haze of superstition and ignorance. To be exact, our present wealth of scientific knowledge had its beginning with the discoveries of Galileo and Newton; and during the intervening three hundred and fifty years unreckoned progress has been made. Dr. Robert A. Millikan, of the California Institute of Technology, talked about these things the other night to the members of the New York State Chamber of Commerce, and interested his audience deeply. The New York Times deemed it worth while to give his address in full for Dr. Millikan, winner of the Nobel prize for research work in isolating the electron, and regarded as the leading American physicist, speaks with authority. He told this important group of industrialists that pure science was the parent of modern industry, and he amply proved his case. He began by alluding to the more or less universal belief a century ago that Bishop Usher's calculation of the date of creation was accurate. It was not known, he asserted very positively, that this world of ours has been in existence for at least a billion years, and, said the speaker, "the human race can probably count on occupying it for a very long time to come, my another billion years." Since the period of time within which our wider knowledge has been gathered might be regarded as no more than a minute, it is the advance of scientific truth which may be reasonably expected to take place that makes the outlook so bright with promise and interest. "There is the possibility ahead of mankind," said Dr. Millikan, "of learning in the next billion years to live at least a million times more wisely than we now live." A glorious prospect indeed.

Commenting on the stimulating story of progress during comparatively recent years, Dr. Millikan showed quite conclusively how the radio and the aeroplane, for example, had been the products of scientific discoveries made by Galileo and Newton and by others since 1580. The upward march to these achievements had been methodical and gradual. "Do you practical men fully realize," he argued, "that the aeroplane was only made possible by the development of the internal combustion engine; that this, in its turn, was only made possible by the development of the laws governing all heat engines, the laws governing dynamics, through the use of the preceding hundred years of the steam engine; that this was only made possible by the preceding 200 years of work in celestial mechanics; that this was only made possible by the discovery of the laws of force and motion by Galileo and Newton?" That states the relation of pure science to industry. And this was just as true of the radio, the fundamental structure of which has been built in the research laboratories since 1910. In all branches of human progress the same story holds true. One step has led to another. We are now moving somewhat rapidly in the broad field of electrical energy, and in the application of the science of electricity gathered in the fruitful century just ended with respect to the elements and the constitution of matter. Pure science has laid the foundation for applied science, and at that point the great captains of industry step in with their genius for organization

and production. If our great-grandparents could return to us for a day they would feel themselves in a world utterly new to them; yet a century hence the change may be even more amazing. Men of science are probing deeper and deeper every day in to the secrets of nature. A truth learned today may tomorrow become a basis of a great and revolutionary invention; and as the world of thinking men and women has moved upward in knowledge along material lines, it has at the same time formed new concepts of the philosophy of life. The quest for truth goes on, and it will be an immeasurable privilege to watch the unfolding of a new era of knowledge.—Montreal Gazette.

Winnipeg Newspaper Union

Diagonal closing of bodice, swathed girle and shirting at one side of skirt, are attractive new style features seen in Design No. 980. The collar that extends to lower edge of waist in front affords splendid opportunity for trimming contrast. As in lustrous crepe satins, it is smart made of the dull side of crepe, which is also used for cuffs and girle. Flat silk crepe, figured sheer velvet, soft woolen with canton-faille crepe silk, printed crepe satin, crepe Roma, crepe Elizabeth, georgette crepe, plain sheer velvet, silk mottle, wool crepe and canton-faille crepe are suitable fabrics to select. Patterns in sizes 16, 18, 20, 22, 24, 26, 28, 30, 32, and 34 inches bust measure and only requires 3 1/2 yards of 40-inch material with 2 1/2 yards of 2-inch lace, as sketched, for the 36-inch size. Price 25c in stamps or coin (coin preferred). Wrap coin carefully.

A recent analysis shows that 38 out of every 100 farmers in western Canada own a motor car and 18 out of every 100 farms have gasoline tractors.

COL. HENRY COCKSHUTT,
Director, Canadian Pacific Railway
Colonel Cockshutt, ex-Lieutenant-Governor of Ontario, is a director of the Canadian Pacific Railway, of the Bank of Montreal, and President of the Cockshutt Plover Company. He was born in Brantford, in 1868, son of Ignatius Cockshutt, and was educated at Brantford Public and High Schools. He has been associated with the Cockshutt Plover Company since 1884, becoming Secretary-Treasurer in 1888, Managing Director in 1893, and later President. He served as Mayor of Brantford during the term of 1899-1900, was President of the Board of Trade in 1898, and President of the Canadian Manufacturers' Association in 1906. He was appointed Lieutenant-Governor of the Province of Ontario in 1921, and served at that post until 1927.

Granary Is Now Wilderness

Bessarabia Faces Famine When Wheat Crop Falls For Second Year

For two consecutive years Bessarabia's wheat crop has failed and what was once Europe's granary, is today a desolate wilderness, with famine in its wake. This summer the rich wheat fields were devastated by a scorching heat and drought. The unusual cold and heavy snowfall has thrown the hard-working population of Bessarabia into despair. Eye-witnesses, who have just returned from the famished districts, report harrowing scenes which occur daily in this remotest and inaccessible part of Roumania. The mortality among the inhabitants has increased alarmingly, because the peasants have resorted to the use of roots, herbs and other non-nutritive foods for sustenance.

With an almost empty treasury, the new Manu Pasant Government has undertaken the gigantic task of feeding a half-million peasants out of state resources. A relief commission which was sent to Bessarabia, has recommended the employment of the male population in the construction of roads. To this measure the Government gave its unqualified approval.

Roumania's wheat exports this year were the lowest in the history of the country.

Will Buy World's Champion Cow
Hon. C. M. Hamilton, minister of agriculture, announces that Saskatchewan will purchase the world's champion Holstein cow from Ben H. Thompson, of Boharn, Sask., her present owner, for \$10,000, to prevent the loss of his splendid animal to the province.

"You were always a fault-finder!" growled his wife. "Yes, dear," responded the husband. "I found you."

Veterinary Surgeon: "Give the cow a tablespoon of this mixture three times a day."
Giles: "Our cow don't have tuberculosis." — Meggendorfer Blaetter, Munich.

Interesting Data Is Furnished Regarding South and North Polar Areas By Explorer

Better Baby Chicks

Inspection Policy Adopted Which May Have Good Results

A policy is to be put into operation by the Department of Agriculture, at Ottawa, to protect the interests of the purchasers of baby chicks. The Baby Chick Association, representing the whole of Canada, has felt the need of some oversight of the hatchery industry, and their executive committee has co-operated with officials of the Live Stock Branch in preparing a workable plan. The policy to be known as "Approved Hatcheries" provides for the inspection of flocks supplying hatchery eggs and the certification of those that measure up to the requirements with respect to laying performance, health and type. The inspection is to be done under the direction of the Live Stock Commissioner by district poultry promoters and others duly qualified for the work. The approved hatcheries themselves are to be under supervision so as to judge of their fitness to do business. Hatcheries wishing to be classed as "Approved" are required first to make application on forms that have been prepared by the Live Stock Commissioner, on which must be recorded, among other things, the breed and variety of the flocks, the date the birds would be ready for inspection and banding, the size of the flocks, both with respect to pullets and hens, and the name and location and capacity of the hatchery.

Famous Cow To

Remain In Saskatchewan

Holstein Cow, Canary Korndyke Alcartra, Purchased By Provincial Government

Purchase for \$10,000, of "Canary Korndyke Alcartra," the Holstein cow holding the world's record for butter fat production, from Ben H. Thompson, of Boharn, by the Saskatchewan government was announced by Hon. C. M. Hamilton, minister of agriculture.

Mr. Hamilton stated that arrangements had been made to leave the cow in the care of Mr. Thompson at "Braeburn" farm at Boharn, six miles from Moose Jaw. "Having developed this animal as well as a number of others with outstanding high records, Mr. Thompson is probably in a better position than anyone else for trying her out for future record," stated Mr. Hamilton.

Shortly after "Canary" beat the previous world's record, Mr. Thompson received an offer from the manager of one of the wealthy corporations operating a large Holstein herd in the United States. Mr. Hamilton said that since this became known he had been flooded with requests from the dairy organizations of the province, as well as from individual dairymen, and dairy manufacturers, that the government should take action to prevent the cow going out of the province.

Should Use Local Paper

Chambers of Commerce are frequently blamed for not getting out more good literature to be sent abroad. Those who raise these complaints could do a great deal themselves by sending out the literature that comes into their own hands in the form of their local newspapers. Rest assured there is no business individual in a town more interested in the growth of his community than is the editor or publisher, for as the town grows he grows.

What Puzzled Him

Talkative Lady: Do you know, professor, I think you are positively wonderful. Has anything ever puzzled you?

Professor (bored): Yes, madam.

One thing has.

Talkative Lady: And what is that.

Oh, do tell me.

Professor: If exercise reduces flesh how is it that so many women have double chins?

Sis: "They tell me she bought that dress by instalments."

He: "Which one is she wearing?"

With the two Antarctic exploration expeditions steadily moving towards their respective bases, news of their arrival on the ice-locked continent will doubtless come in due course. Meantime, a large measure of preparatory interest attaches to a legacy left behind him by that greatest of Polar travellers, Roald Amundsen, the only man who ever reached both poles and the first who stood on the southern extremity of the earth's axis. This Norwegian scientist-adventurer lost his life in a generous effort to aid in the work of rescuing the ill-fated dirigible party, headed by the Italian General Nobile, and the manner of Amundsen's passing bedevilled the heroism that distinguished his remarkable career. Only a little while before setting out on the airplane flight from which he did not return he wrote for Nomad, a magazine of travel and adventure, an article, really part of a narrative he had planned about his polar explorations. In its current issue, Nomad publishes the portion Amundsen had completed, making clear the marked physical differences between the two Poles.

According to the great Norwegian, the North Pole is an enormous sea covered with drifting ice. So far as known, the depth of this Arctic Ocean is about 15,000 feet. Contrastwise, the South Pole is an equally enormous continent, with mountain peaks rising to a height of 18,000 feet. The interior of this massive continent consists of an immense plateau with an average height of 10,000 feet above sea level. These two contrasting polar regions have only one thing in common, the fact that animal life abounds in the regions where the open sea meets the edge of the ice mass. This, Amundsen remarks, is the only similarity for the species of animals dwelling there that do not exist beyond the ice barrier are quite different. The North Pole has the polar and other bears, the walrus, the seal and birds. But the South Pole has no polar bear and no walrus, its seals differ from those of the north, and it possesses sea lions and birds, mostly the penguin. Amundsen describes the penguin as the most characteristic creature of South Polar latitudes, walking like a human being and a wonderful swimmer.

Yet another difference between the North and South Polar regions is the absence of human inhabitants from the Antarctic continent whose average temperature is about ten degrees lower than the Arctic. Yet the lowest temperature Amundsen struck there was 75 degrees below zero, whereas he encountered 80 degrees below in the Arctic. The North Pole he remarks, is drifting ice and very uncertain, but the South Pole can be located as exactly as is possible with travelling astronomical instruments. The latter region is an immense plateau, with no cliff or anything to mark the Pole, a desert of unbroken ice, and presenting a remarkable contrast to the North Pole desert with its broken and drifting ice masses.

London's Automatic Lights

One street in Barnes, London, S.W., has been lighted by automatic lamps for the last twelve months. Each street-lamp is fitted with a stenoium cell, which is affected by either twilight or fog, and turns on the light.

"Did you have sunbaths at the seaside?"
"No, unfortunately, I can't swim."
—Moustique, Charlier.

"Doctor, you ordered me to rub my head with brandy, but I can't—try as I will, I can't get the brandy past my mouth."—Lustige Koller, Zellung, Cologne.

WORLD HAPPENINGS
BRIEFLY TOLD

Fully 18,000 people visited in September the plant at Howden, England, where Alirap R-100 is being constructed.

The Duke of Abercorn has been sworn in as governor of Northern Ireland for a second period of six years.

U.S. Ambassador Schurman has presented an American fund of \$500,000 for a new hall of instruction in the ancient University city of Heidelberg.

Commemorating the 25th anniversary of the Wright flight at Kittyhawk, the Paris chapter of the United States Aeronautical Association gave a luncheon.

Premier Mackenzie King celebrated his 54th birthday, December 17. Mr. King has been leader of the Liberal party since August, 1919, and prime minister since December, 1921.

Using woundbands to assist in capturing their prey, R. S. Cruickshank and W. E. Bayne, of Herschel, Sask., have killed approximately 100 coyotes this season. Eighty-seven of the skins were sold to the buyers.

Parliament will likely be asked at its next session to consider legislation for the return of railway and Peace River lands to British Columbia. Hon. Charles Stewart, minister of interior, states.

On Dec. 17, Theodore Roberts was buried in Hollywood cemetery, in the city where his motion picture characterizations made him an international figure. Scores of movie stars and actors attended the service.

Investigation of the problem of level railway crossings throughout Canada probably will be started very soon by Hon. Frank Oliver. Mr. Oliver was recently appointed advisory officer to the board of railway commissioners for this purpose.

Commodore Bartlett, Salvage Superintendent, has advised the White Star Line that the big liner Celtic which went on the rocks off Queens-town, Ireland, could not be salvaged. Bartlett advised the company that salvage would be impracticable and recommended that salvage expense was not justified.

For Catarrh.—It is one of the chief recommendations of Dr. Thomas' Electric Oil that it can be used internally with as much success as it can outwardly. Sufferers from catarrh will find that the Oil when used according to directions will give prompt relief. Many sufferers from this ailment have found relief in the Oil and have sent testimonials.

Soy-Beans in Canada

Plant Was Introduced Into This Country in Early Year Of Eighteenth Century

The soy-bean is an ancient cultivated plant of China and Japan. It is said to have been introduced into North America during the early years of the eighteenth century. It was not, however, till about 1800 that it began to establish itself in the agriculture of this continent. In Canada the main areas of production are the central and south-western portions of Ontario. Small areas have been grown in every province in the Dominion and the increasing interest in this crop, in conjunction with the development of earlier maturing varieties, indicates that the future will see a considerable increase in the production of soy-beans in Canada.

"Sophia, what do you mean by wiping the plates on your handkerchief?"

"It doesn't matter, ma'am, as the handkerchief has to be washed in any case."—Kasper, Stockholm.

W. N. U. 1735

Tentative Date For
Next Arms Conference

Nations Have Agreed On Eleventh Of Next March

Agreement on March 11, 1929, as the tentative date for the next session of the preparatory disarmament commission, and an accord between Great Britain and Italy as to procedure for carrying out the agreement for settlement of the reparations problem and evacuation of the Rhineland, were outstanding developments in connection with a recent meeting of the Council of the League of Nations.

The British-Italian agreement was announced by Sir Austen Chamberlain, British foreign secretary. It was deemed important as those two powers were named as guarantors of peace on the Rhine under the Locarno pact. Their accord at this juncture was also believed to indicate an agreement concerning the powers of the commission of verification and conciliation which will be substituted for the allied troops when the latter are removed from the Rhine provinces.

Germany does not wish to see the commission function after 1935. That year was set by the treaty of Versailles as the last under which allied troops might remain in the Rhineland.

Alberta Homesteads

During the week ending November 16th, 176 homesteads and 3 soldier grants were taken out at the Edmonton land office, as compared with 26 homesteads and 1 soldier grant during the same week of 1927.

Simple—Youthful

It will be difficult to find a more becoming blouse as simple and youthful as Style No. 299, with effective monogram embroidery, which contrasts smartly with tone of blouse. You can cut it out and make it in an hour. See small illustration showing two major parts. Trucks add trimming note, and give fitted line to shoulders. It can be made with or without the inset pockets. Wool jersey to be worn with velvet or tweed skirt is attractive for classroom. Lustre satin crepe, flat silk crepe, cantonfille crepe, georgette crepe, wool crepe, lame, sheer crepe with metal threads, and velvet are suggested fabrics. Paris is using this season for separate blouses, particularly popular with the youthful type of woman, both for utility and more formal occasions. Pattern for this charming blouse, made at 18, 20 years, 36, 38, 40, and 42 inches bust. Price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully. Emb. Trans. No. 11012 (blue) costs extra.

HIS GOVERNMENT DEFEATED

The Coates government has been defeated in New Zealand 50-28 on a no-confidence motion. Sir Joseph Ward, Union party leader, has been called to form a new cabinet. Premier J. G. Coates, is shown above. The government has resigned.

Victory Seems Complete

Public Opinion Has Been Conquered

By Motor Car
The victory of the motor car is complete. No longer is it possible to doubt that the car has conquered public opinion.

The motor car first owned the town. Now it owns the township as well.

There was a time when it was seriously proposed in Ontario no motor car should appear on the highways except at certain permitted hours, morning and evening. Thus horse-drawn traffic, unenforced, could hold the roads half the day. Now the horse is seldom seen on the highway.

Not so long ago the law required motorists, on meeting a funeral or overtaking one, to come to a standstill. But the motor car overcame that difficulty by taking over the funerals and speeding them up. The departed citizen roils along on balloons tied to his sepulchre and his funeral impedes traffic little if at all.

The conclusive victory of the motor car came the other day when a village jury, in a coroner's inquest on a farmer who had been killed on the highway by an automobile, returned a verdict recommending that pedestrians walking on the roads at night should be required to carry lights. A few years ago there was strong opposition in the rural parts to the law requiring all vehicles to carry lights. What is the world coming to? 7 old men asked. But the regulation has come to be regarded as a necessary one. When the coroner's jury recommended that all pedestrians should carry lights after dark we expected an uprising of the embattled farmers of the province against the suggestion. There has been scarcely a word of protest. Instead, in several rural journals there have appeared items approving the suggestion as one that would work for the good of all.

The gasoline buggy has won out. The farmers drive it, the county councillors, the township councillors, the editors of the village weeklies, the members of the legislature and of parliament drive it. None of us are pedestrians any more, except now and then between rides.—Toronto Star.

Demand For Pulpingstones

There is a demand for good pulpingstones and over half a million dollars worth are used annually in Canadian pulp mills. The 1928 Canadian pulpingstone production is the highest on record, but only about 10 per cent. of the stones used in Canadian mills are produced in Canada.

"How often have I told you not to whistle?"

"Seven times, mother."—Lustige Kolner Zeitung, Cologne.

SUNDAY SCHOOL LESSON

DECEMBER 30

PAUL'S LAST MESSAGE

Golden Text: "I have fought this good fight, I have finished the course, I have kept the faith." 2 Timothy 4.7.
Lesson, 2 Timothy 4.1-18.
Devotional Reading: Psalm 98.

Explanations and Comments

Paul exhorts Timothy to Preach the Word, verses 1-4.—"I charge thee in the sight of God and of Christ Jesus, who shall judge the living and the dead, and by His appearing and His Kingdom"; thus solemnly Paul begins his appeal to Timothy. "It has all the seriousness of a last farewell, and his own even more solemn by the phrases with which it is introduced, as the apostle charges Timothy in the sight of God and also of Christ Jesus, of whose unseen presence both Paul and Timothy are conscious, to whom both must give account in the great day when he comes to 'judge the living and the dead'."—C. R. Erdman.

And what was the charge? "To preach the word; be urgent in season, out of season; reprove, rebuke, exhort, with all long-suffering and teaching." "By being urgent in season, out of season, Paul does not mean that at every possible season he must be eager to present the Word of life."—C. R. Erdman. "Not out of season to other people, but out of season to yourself, when it is an inconvenience to you."—Charles Brown. "Take opportunity, or make it."

"For the time is coming, Paul told Timothy, when the people will not give heed to sound doctrine, but in their curiosity will seek teachers after their own desires, turning away from the truth into fables."

"This was the harvest reaped in the large communities over which the Church of Rome exercised its domination. When the Scriptures were neglected in the worship and preaching, the people were misled by instead fabulous stories of the life and exploits of the saints. The numerous legends grew with the desire for them. All the historic facts of Christianity were thrust into the background."—J. P. Lilley.

Recipes For This Week

(By Betty Barclay)

LEMON MINCEMEAT

4 lemons.
2 apples.
1 pound currants.

1/2 cup raisins.

1/2 cup chopped nuts.

1/2 cup melted butter.

2 cups sugar.

1 teaspoon salt.

1 teaspoon ground cinnamon.

1-3 cups ground nutmeg.

1 teaspoon ground cloves.

1 teaspoon ground ginger.

1 teaspoon ground allspice.

Squeeze juice from lemons and cook pulp until soft. Put through meat-chopper and then rub through a sieve. Add chopped apples and remaining ingredients, mix well and store in jars. Use as a filling for turnovers and pies.

JUNKET PLUM PUDDING

1 package chocolate junket.

1 pint milk.

1-3 cup raisins.

1-3 cup dates.

1-3 cup figs.

1 cup water.

1/2 cup sugar.

1 tablespoon lemon juice.

1/2 teaspoon cinnamon.

1/2 teaspoon clove.

Cut raisins, dates and figs in small pieces; add sugar and cook slowly until tender. Add sugar and boil until thick. Add lemon juice. Cool slightly; place in bottoms of individual dessert glasses. Warm the milk until lukewarm—not hot—and dissolve in it the chocolate junket. Add spices; pour over fruit, and let stand in a warm place until firm. Chill before serving. Top with whipped cream and maraschino cherry.

Her—You deceived me when I married you.

Him—I did more than that. I deceived myself.

Legislation
Respecting Liens

Removing Financial Obstructions To

Operation Of Farm Lands In Certain Areas

Hon. Charles Stewart, Minister of the Interior, is gratified with the results of the legislation respecting liens on certain classes of system lands, which he obtained from Parliament in the session of 1927.

By the work of committees set up by this Act (The Crown Debts Act) and other financial obstructions to operation placed on lands in certain areas during the dry years following 1914 to attempt to insure repayment of advances for seed grain and fodder, are being adjusted. It is expected from what Hon. Mr. Stewart learned from his study of the working out of the plan while in the West, that a number of farmers who might have been forced from the land will be encouraged to remain as a result of these adjustments, which were made at no cost to the settler for the legal process, and that areas which have been tied up and non-productive can now be disposed of to those who will put them to the use for which they are fitted.

As explained in Parliament, where the bill was fully discussed, there was a rapid advance of settlement, especially from 1912 to 1915, into areas in southeastern Alberta and southwestern Saskatchewan, formerly devoted to ranching. The extremely dry years following 1914 experienced by this district seriously crippled these new settlers and in order to assist them, especially in view of the need for increased food production caused by the war, grants of seed grain, fodder, and other forms of relief were made during the winter of 1914-15, and the following spring. The area, however, has proved too dry for grain farming, although suited to grazing; and while considerable portions of these loans were repaid the result was a whole area that grain farmers moved to other districts and much of the land was tied up by the liens for advances by the federal and provincial governments and by loan companies. Some settlers, however, remained, desired to secure additional lands and to get a sufficient acreage for grazing, and others were anxious to come in to undertake the pasturing of cattle. Both were prevented by the existence of these liens.

Time Has Tested It.—Dr. Thomas' Electric Oil has been on the market upwards of fifty years and in that time it has proved a blessing to thousands. It is in high favor throughout Canada and its excellence has carried its fame beyond the seas. If it were double the price it would be a cheap liniment.

Mica in Canada

Mica is produced in Canada mainly from mines in the Ottawa region, both in Ontario and Quebec. The Quebec deposits lie between the Lavie and Gatineau rivers, and the Ontario deposits, in the Perth-Kingston district. The mine near Sydenham, Ontario, is probably the largest mica mine in the world.

Unless worms be expelled from the system, no child can be healthy. Mother Graves' Worm Exterminator is an excellent medicine to destroy worms.

Large Bill For Ice Cream

America's bill for ice cream sodas and other fountain drinks is \$4,109,561 a day, it was disclosed at the annual convention of soda fountain manufacturers held in Chicago.

"But it is very dear."

"No, madam, and it suits you divinely."

"Send it along, and I will see how it suits my husband."—Buen Humor, Madrid.

WHY CANADA SHOULD REMAIN IN THE LEAGUE

Ottawa.—It is well worth while for Canada to remain a member of the League of Nations, Hon. C. A. Dunning, minister of railways and canals told a large meeting of the Canadian Club here. Mr. Dunning was one of Canada's representatives at the meeting of the League of Nations assembly in Geneva this year along with Premier Mackenzie King and Senator Dandurand.

"I am often asked," Mr. Dunning said, "whether it would not be better for Canada to adopt the attitude of aloofness taken by the United States in respect to the League since we were a new country on a continent separated from the prejudices and animosities of the old world."

The last war, he said, had proved that Canada could not afford to ignore the quarrels of other countries and let them fight it out among themselves. The dispute of the smallest of nations might bring all nations into conflict.

The exceeding courtesy that prevailed at all meetings impressed Mr. Dunning. The greater the prejudices, age-old hatreds and fears existing between nations, the greater the courtesy the representatives of these countries displayed to one another whenever they come in contact.

"As a westerner," Mr. Dunning explained, "accustomed to being more direct, this extreme courtesy at times became irksome. I asked one of the delegates who the representatives of the league did not say what they really meant. He said that if they did the league would show up in ten minutes."

Mr. Dunning pointed this out to show that every effort was made to avoid hurting any one's feelings.

Canada Adopts U.S. System

Issuing Identification Cards To Citizens At Windsor

Windsor.—The card identification system now used by the United States immigration inspectors at the Detroit docks of the Windsor and Walkerville ferries will be adopted by the Canadian inspectors, according to announcement by O. G. Adams, immigration inspector in charge at Windsor. Cards contain the photograph of the applicant.

A green card will be issued to the Canadian citizen by birth, a salmon card to the Canadian alien by naturalization and British subject by legal landing status; a yellow card for the citizens of the United States and preferred countries only who have made legal entry into Canada and who are residents of the border cities employed in Detroit and commuting daily for crossing the border frequently on business.

Promises Not To Interfere

U.S. Will Respect South America's Rights, Says Hoover

Buenos Aires.—La Poca, a newspaper which is generally regarded as a spokesman for President Trigoysen, said that Herbert Hoover in conversing with the Argentine president, told him that in the future the United States government would never interfere in the internal affairs of other countries, that it would respect their right to manage their own problems. President Trigoysen was quoted as saying that he believed that Mr. Hoover was not in accord with the ideas of President Coolidge.

Branch Line Endorsed

Saskatoon.—The executive of the Saskatchewan Branch United Farmers of Canada here have unanimously endorsed the projected Canadian National Railway route from Aberdeen to Melville. This route it is claimed will make a difference of at least a cent a bushel on grain shipped to Fort Churchill.

W. N. U. 1765

Make Big Drug Seizure

Narcotics Seized At New York Pier Valued At Five Millions

New York.—Narcotics valued by federal authorities at \$5,000,000, were seized by special agents of the treasury department at a Hudson River pier.

The seizure was described by United States Attorney Tuttle as the largest of its kind on record.

Tuttle said arrangements for bringing in the contraband which arrived Friday, on the French liner Rochambeau, had been made by a man named Klein, a name which was one of the aliases used by Joseph Ungar, recently arrested on narcotic charges growing out of the investigation of the slaying of Arnold Rothstein, Broadway gambler.

The narcotics, contained in five large packing cases, were marked as being trans-shipped to an unidentified consignee in Philadelphia.

Four of the cases seized were opened by special agents and were found filled with opium, cocaine and morphine.

Alberta Resources Question

New Offer By Federal Government Is More Satisfactory

Edmonton.—A new offer from the Dominion Government for the transfer of Alberta's natural resources to federal control is the outcome of the conference just held in Ottawa, according to Hon. R. G. Reid, provincial treasurer, who is the first of the Alberta ministers to return home. This offer is better than any yet made, says Mr. Reid, and is not based on any accounting of previous receipts and expenditures.

As soon as Premier Brownlee returns and the Executive Council can get together, the offer now on the table will be taken up by the Government, prior to introduction in the Legislature. No public announcement of the terms is being made in the meantime, the matter having first to be decided, as to acceptance or rejection by the Government.

Quebec Accepts Dawn Film

British Made Edith Cavell Picture Passed By Censors

Montreal, Que.—"Dawn," the British made Edith Cavell film, which has been the subject of considerable controversy in Britain and elsewhere throughout the Empire, has been passed by the Quebec provincial censors. Banned in Great Britain, it has also been rejected in Ontario and Saskatchewan, but is said to have been accepted by the authorities in the other provinces, and the holders of the Canadian rights are hoping that in view of Quebec's decision, the Ontario and Saskatchewan censors will reconsider their decision. The picture has been shown in New York. Sybil Thorndyke, one of the most distinguished of British actresses, takes the role of the martyred English nurse.

Revolts Blamed On Ruler

Afghanistan King Has Not Paid Troops Is Report

London, Eng.—The trouble that King Amanullah of Afghanistan, in having in suppressing revolts was said in despatches to be due to his failure to pay his army.

A despatch from Lahore, India, said that the army had not been paid for some time past. The Daily Mail printed a despatch from Bombay saying that the standing army of 35,000 was disaffected because of insufficient pay.

A Karachi despatch to the Daily Express quoted a merchant from Kabul, capital of Afghanistan, as saying that the King used army funds to pay for his many purchases in Europe. It was claimed that the army had not been paid for three months.

Aviator Makes New Record

St. Louis, Mo.—A new world's record for continuous barrel rolling in an aeroplane was established at St. Louis, Mo., when Del (Red) Jackson, test pilot, made 417 rolls in a Curtis plane. The previous record was 283 rolls. In a barrel roll an aeroplane rolls wing end over wing end in a corkscrew manner while maintaining its speed forward.

Rector Of Queen's University

Dr. O. D. Skelton, under-secretary of state for external affairs in the Canadian Government, has been elected rector of Queen's University in succession to Dr. Coverdale, whose three year tenure of office has expired. Dr. Skelton was graduated from Queen's in 1899.

New Gas Well

Largest Producer Ever Struck In the Medicine Hat Field

Lethbridge, Alta.—Forty million cubic feet of gas daily was struck in the Eagle Butte well being drilled in the Cypress Hills, 35 miles south-east of Medicine Hat, the largest gasser ever brought in the Medicine Hat field. The gas sands were tapped at 3,300 feet. The structure on which the well was drilled by Medicine Hat and Kansas interests, headed by C. E. Roth, was blanketed a year ago last summer by the Harkness-Rowe interests, of Toronto, in a filling cup, in which 80,000 acres were covered \$50,000 being paid over the counter of the land office here in one operation. It is understood the gas is dry gas.

Power Of The Duce

Rome.—Mussolini, has taken over the Ministry of Colonies, thus assuming seven of the 13 portfolios in the government, and constituting himself a majority of the cabinet. He now holds the most important department in his own hands, having, besides Colonies, the departments of Foreign Affairs, War, Marine, Aviation, Interior and Corporation.

Will Discuss Matter Later

Ottawa, Ont.—It is understood the federal government does not desire to discuss at present terms with the Saskatchewan government on which the natural resources will be returned. It is felt that the Alberta terms should first be agreed upon, and the same given Saskatchewan.

SAILS ON MAIDEN VOYAGE

The R.M.S. Lady Nelson, one of the five new vessels built for the Canadian National Steamship Fleet, in accordance with the Canada-West Indies Treaty, sails from Halifax on her maiden trip on December 14th. The photograph shows the Lady Nelson on her arrival in Canada from Great Britain, where she was built, and inset, her skipper, Captain J. M. Reith. The new ships are 8,000 tons and their passenger accommodation was designed specially for tropical travel. Already a number of winter tours from Canada to the West Indies have been booked for the various sailings of these new steamships.

Cause Of Death Unknown

Coroner's Jury In Ralph McKay Case Unable To Determine What Caused Death

London, Ont.—The mystery of the fate of Ralph McKay deepened when a coroner's jury, after hearing medical testimony, returned a verdict to the effect that they were unable to state the cause of death. The son of Mr. and Mrs. J. H. McKay, of Regina and a student at Western Ontario University, disappeared strangely on the night of October 25 and for nearly two months diligent search failed to reveal any clue to his whereabouts. Recently his decomposed body was found in the River Thames by children.

The jury's finding was based largely on the testimony of Dr. Fred W. Luney, who was given charge of the body two hours after it was removed from the water.

Dr. Luney, who performed an autopsy, declared that he had found no marks of external violence and no fractures of any bones. There was no water in the lungs and the stomach, which was empty, did not indicate the convulsive struggle usual after death by drowning. Nor was any symptom of poison in the system.

"In fact," said the doctor, "I can not tell the actual cause of death."

Aid For Distressed Miners

Prince Of Wales Has Issued An Appeal For National Effort

London, Eng.—The Prince of Wales has issued a personal appeal in behalf of the distressed women and children in the mining areas of the kingdom. He called for a combined national effort to give material help to the thousands who, through the shutting down of the mines, are suffering dire poverty.

Announcing that he had accepted the position of patron of the relief fund, the heir-apparent said:

"Let us re-assert the spirit of the war when we recognized every effort made by the government as a new call to individual self-sacrifice."

Heads Saskatchewan Pool

Regina, Sask.—A. J. McPhail, Laddstock, was re-elected president of the Saskatchewan Wheat Pool Association at the initial meeting of the board of directors held in the board room at the head office at Regina. L. C. Brouillette, Landis, was re-elected vice-president, while R. J. Moffatt, Bradwell, was again chosen managing director.

Postpone Treaty Parley

Washington.—Postponement of consideration of the Kellogg-Briand anti-war treaty reported to the senate until after the Christmas recess has been decided upon by Senator Borah in charge of the treaty fight after consultation with leaders.

EXPECT PEACEFUL SETTLEMENT OF BOLIVIA TROUBLE

Washington, D.C.—The Pan American conference through an American committee has asked Bolivia and Paraguay to reach a peaceful settlement of their differences.

Meeting with Bolivian minister Diego De Medina and the Paraguayan delegate, Ayala, the special committee on mediation between the two countries formally expressed to the two representatives the "hope that their differences will be settled in a peaceful and satisfactory manner."

After a two-hour session, Dr. Maurtua of Peru, chairman of the special committee announced it would continue to gather certain information on the conflict before reporting to the plenary session of the conference.

"We have a well founded belief that the situation will be settled satisfactorily," Maurtua said.

Paris.—Foreign Minister Briand of France, who is president of the League of Nations council and Sir Eric Drummond, secretary-general of the League have reached an agreement that peace measures in the western hemisphere had removed the necessity of calling a special session of the League council.

Huge Increase In Crop Movement

Over Hundred Million Bushels More Carried On Great Lakes

Port Huron, Ont.—Official figures on Lake movement of grain during the season of navigation and for the crop season of 1928 have just been issued by the board of grain commissioners. They show an increase of over 100,000,000 bushels in the movement of grain during the season of navigation from May 4 to December 12, and of nearly 80,000,000 bushels in the movement during the crop season, from August 10 to December 12.

During the whole season of navigation, grain taken down the lakes totalled 385,061,444 bushels as compared with 279,488,714 in 1927. From August 1 to the close of navigation, the movement was 262,298,416 bushels, compared with 185,912,976 in 1927.

The number of cargoes that went from this port during the season of navigation was 1,568, of which 882 were carried in Canadian bottoms, 668 in United States bottoms, and 18 in other vessels.

May Be Elevated To Peerage

Sir Austen Chamberlain May Enter House Of Lords

London.—The Evening Star says there are strong rumors in Conservative circles that Sir Austen Chamberlain, secretary for foreign affairs, will not seek re-election in West Birmingham in the next general election. No confirmation is obtainable at the moment, but the newspaper says the suggestion is quite tenable. It is possible Sir Austen may be elevated to the peerage, it adds, for if the present government were returned to power it would be quite in keeping with Conservative precedent to have the foreign secretary in the house of lords.

Spread Of Influenza

Toronto.—Influenza epidemics seem to have their origin in the common cold, and the Ontario Public Health Act should be amended to provide that pupils might be sent home from public schools when primary symptoms of cold are noticed according to the findings of the conference called today by Dr. W. J. Bell, deputy minister of health. The conclusion was reached that the outbreak of "flu" in the province was "widespread."

Growth Of Saskatoon

Saskatoon.—The statement that a survey indicated a population of 45,000 in Saskatoon, and an attendance at educational institutions of 12,664, featured the report of Commissioner J. Holmes to the quarterly meeting of the Board of Trade here.

The New Chevrolet Six.

In the Chevrolet six-cylinder line just announced is seen one of the most important developments in recent motor history—the production of a powerful and attractive six in the low price range hitherto occupied exclusively by fours. Among the seven new models offered are the coach and sport cabriolet, seen above together with the fully enclosed valve-in-head motor.

This motor develops 48 horsepower—32 per cent more than its four-cylinder predecessor. The factory states that "speed has been stepped up to satisfy maximum requirements."

Notable features are gasoline pump instead of vacuum tank

feed, adjustable driver's seat, water temperature gauge on dash, and special accelerating pump which operates when the accelerator is depressed.

The announcement of the new

car reveals that Chevrolet engineers began four years ago the research and planning and proving ground testing which culminated in the new car. More than 100 different motors are said to have been built and tested.

Here and There

(303)
Quebec city's new grain elevator will be completed in January, it is now thought. All that remains to be done is the 200,000 bushel structure is to complete the three galleries and the marine tower.

A Chicago Holstein breeder has made a special offer to B. H. Thomson of Bradburn Farm, Bohara, Saskatchewan, for his world champion Holstein cow, Canary Koradys Alcatraz; but representations are being made to the Provincial Government to have this famous animal retained in the province.

"You don't have to sell the idea of game protection and conservation to sportsmen," said James W. Stuber, well known sporting writer who attended the recent banquet in Montreal of the Quebec Association for the Protection of Fish and Game. "The problem is to convince the settler and guide in the backwoods that a surplus of game for the attraction of the hunter means money in their pockets and a source of revenue to many classes in the community."

The Santa Claus team of fairy reindeer must be having an exciting time these days in keeping pace with modern delivery methods, for Christmas presents shipped by Canadian-Pacific Express are being speeded through the clouds by airplanes. Between Quebec, Montreal, New York, Ottawa, and Toronto, in the east and Winnipeg, Regina, Calgary, and Edmonton in the west, airplanes have been busy this season carrying air mail and express matter and many belated shippers have been able to have their presents delivered before Christmas by using the air express service.

Vancouver is rolling up its 5th bottomed trousers in preparation for the four day Sea Music Festival to be held at the Hotel Vancouver from January 23 to 26. The cheery sea chants and famous salt water ballads that have been sung by sailors for many centuries will be presented at this novel music festival, which promises to be one of the most popular and important events of the season in the west. It will be preceded by a Yuletide Festival at the Empress Hotel at Victoria when Christmas carols will be sung by well known artists and many quaint old customs will be revived by the players.

The finest show herd and the only shipment of its kind ever sent out of Canada is now on its way to Australia. Twenty seven animals, three bulls and 24 females, the cream of James D. McGregor's famous Glenearnock stock farms, have been loaded into C. P. R. cars and started on their long journey to New South Wales. Twenty of the animals will be used for the foundation herd of the government animal husbandry department, while seven others will go to private purchasers. All are of the finest stock raised by the leading Aberdeen Angus breeder and most of them have won prizes at fairs and stock shows throughout the continent.

CHAPTER X.—Continued.

"One of the office men by name of Renwick. He's one of them narrow 'tween-the-eyes, palm-singer' old has-been that sez 'ut tut' every time he hears a logger say 'damn.' His health is poor, so they're going to send him up here to take charge of this mill. 'Thanks be, I'm goin' to have charge in the woods, so I won't have nothin' to do with him'."

They discussed the matter during the day, and that evening they again visited the falls. From the trapper Donald learned that the supply of water was unaffailing. Owing to the natural formation the cost of building the dam would be small. Donald's friends became as enthusiastic as himself.

"We'll be finished to-morrow night, Douglas," announced Gillis that evening. "If you and Donald want to, you can go to town and put this proposition up to your father."

The lines of steel were creeping north slowly but surely. As they left the cabin to start for the Coast, the first faint boom of a blast was brought to their ears by the southern breeze. Ten miles south of the lake they came to steel and rods to Squamish in the cab of a locomotive, reaching Vancouver that night.

Douglas informed Donald over the phone the next morning that his father would give him a hearing at two o'clock that afternoon.

As Donald thought of the impending meeting he experienced certain inward qualms. He felt that Renwick would oppose him, and wondered if Robert Rennie would consider him conceded and forward in suggesting such a radical innovation.

At the appointed hour Donald and Douglas entered the office of the R. C. & L. Co. Robert Rennie greeted Donald with a friendly smile and motioned to chairs near the desk. "You have some papers with you, I presume," he said.

Donald placed the rough plans on the desk before him. For five minutes Robert Rennie studied them quietly while Donald fidgeted. Without comment he leaned back in his chair for a moment, apparently in deep thought. Presently he pressed a button at the side of his desk.

"Send Renwick, Bolton, and King here," he said to the boy who answered the bell.

As the men entered the room Donald had no difficulty in recognizing Renwick from Gillis's description. Robert Rennie rose to introduce Don-

ald, then spoke in quick, flashing sentences that went straight to the heart of things, as he spread the plans on the table before them.

As Donald had anticipated, Renwick, after a short scrutiny of the papers, objected strenuously, his chief objection being the initial cost together with the fact that experience had demonstrated that only small mills had proved a success when electrically driven. Bolton was to the same opinion, but he admitted that if the supply of timber were sufficient to keep the mill in operation for years, the initial cost would be offset by the economy of operation.

King, the company's chief engineer, vouchsafed no opinion, but sat with Donald's plans before him, copying the figures in his note-book.

Robert Rennie glanced at Donald expectantly.

Donald spoke of the lessened cost of operation in an electrically-driven mill by the reduction of the number of millwrights, oilers and helpers, the lower insurance rates, the saving on line-shafting, belts and oil, of the advantage in speed over a steam mill, etc. As he warmed to this subject he came to his feet and leaned over the desk.

"As you gentlemen know, the greatest enemy of the mill-owner is fire. With a steam-mill of the size you are to build, with donkey engines and locomotives operated by steam, you will have a battery of smokestacks that will be an hourly menace during the summer months in the dry air at that altitude. Electricity your mill and donkey engines and you will reduce the fire hazard by seventy per cent. I don't ask you to accept my opinion. I advise you to investigate thoroughly before deciding. An electric mill with the enormous power available would be a credit, not to this company, but to the Province as well.

Robert Rennie's brain functioned with a clear-cut precision. He would listen to the advice of his experts with an attentive ear, and his decision was usually made before the last one had ceased talking.

While Donald was talking Robert Rennie sat forward in his chair with a look of almost strained attention. As Donald finished he swung quickly to his chief engineer. "King, tomorrow you go to Summit Lake. Furnish a full report. If your figures correspond with McLean's we will install an electric plant. Bolton, get quotations at once on electrical equipment. That's all," he finished tersely.

He turned to the two young men as the door closed. "Beginning with the first of next month, McLean, if you so wish, you will act as assistant manager at the Summit Lake Mill. And you," he turned to Douglas, "will occupy a similar position at the Chequamegon plant." He rang for his stenographer, who entered at once.

Donald muttered an embarrassed thanks, and as he passed through the door he heard Robert Rennie's voice in rapid dictation.

They spent the remainder of the afternoon buying supplies from the list which Andy had furnished them. There were numerous delicacies in the items of foodstuffs that brought exclamations of surprise from Douglas. "There is everything here to serve a banquet; even tabbouleh and napkins. What is the little beggar up to now, I wonder?" he said laughingly.

"His birthday," explained Donald. "He is going to invite the Wainwrights and John Hillier. And besides," he added, "I think he wants to show the old trapper that he can do a little fancy cooking himself."

Janet Rennie could not interpret the inner urge that prompted her to arise at an early hour the next morning to drive her brother to the wharf.

It rather bewildered her—made her ashamed of herself that she could not put Donald from her mind entirely. "Why can't you forget him?" she asked herself in protest for the thousandth time. As the boat pulled away from the dock she waved an adieu and, with a troubled look in her eyes, swung her car cityward.

For two days after their return to the mountains, his little cabin was a hive of industry. Andy banished his fellow-loggers to the outdoors at every opportunity while he performed mysterious rites over the small stove. "I'll show that juggling 'old pirate what a real meal is like," he chuckled to himself.

Their guest arrived late in the

afternoon and sat outside in the warm sun while Andy bustled himself behind his closed door.

Old John's face shone from vigorous application of soap and towel. His sole change in attire for the occasion was a clean, washable coat from the breast pocket of which protruded the corner of a red silk handkerchief.

Connie's abundant golden hair had been carefully brushed, and hung over her shoulders in gleaming, billowy waves that reached to her waist-line. She seated herself a short distance from the party and took no part in the conversation. This was her first social affair and she felt ill at ease. Donald's repeated attempts to break her reserve were answered in monosyllables.

The door opened to disclose a remarkable figure framed in the entrance. Andy stood before them in the most ridiculous make-up of a butler. An old black coat of Gillis's, cut off at the sides to form a "claw-hammer," hung loosely over his narrow shoulders; side-whiskers of tree moss were stuck to his cheeks, and his faces was as stolid as a graven image.

"Dinner is now being served in the main dining-hall, me lord," he intoned slowly.

They applauded Andy's effort heartily, and as they laughingly entered the cabin they met the eyes that were so remarkably incongruous amid such drab surroundings.

A snow-white cloth covered the rough board table. A huge turkey, with bulging breast browned to a crispness, graced the centre of the board. Oysters in the shell, celery salads, several kinds of vegetables, pies, cookies and fancy cheeses were in tempting abundance; and in a place of honor near the turkey reposed Andy's birthday cake, its frost-covered surface covered with tiny candies.

Connie's blue eyes opened wide with wonder. "Oh, Dad!" she cried joyously, "it's just like stories, isn't it?"

John tossed his hat to the floor in the corner. "You can deliver the goods of time, sure enough," he commended in a tone of respect.

It was an odd party that gathered in the log hut in the wilderness to celebrate Andy's birthday—a wilderness whose silence was soon to be broken by the crash of trees and the clang of steel. A late blast, so near that the cabin trembled, caused the old trapper to shiver slightly.

"Trains will soon be running through your backyard, John," observed Douglas.

The old man shook his head sadly. "He's concurred, 'an' I'll be 'titten' the trail again before long."

Andy's banquet proceeded merrily, and when the last course was finished Donald took a bundle from the shelf and placed it in the centre of the table. "Something I brought from town for you," he smiled.

Connie's colour heightened. "For me?" she asked incredulously.

"Yes, some reading matter."

"Thank you," she murmured softly, as her quick fingers unwrapped the package. She cried aloud with delight as half a dozen novels and as many magazines were disclosed to view.

"And here, Andy, is a present for you," said Donald as he dragged a box from the corner; "something to assist in passing away the time pleasantly."

Andy's joy knew no bounds when, opening the box, a superb Victrola was disclosed to view.

Suddenly the sweet strains of a full orchestra playing the "Barcarolle" filled the room. Connie was enraptured. She stood with bowed head and closed eyes, her hands pressed to her throbbing breast, as the music stirred her emotional soul to its depths. She sighed deeply and her cheeks were wet with tears as she moved to the machine when the music ceased.

They all sang the chorus to the "Old Oaken Bucket," "Swanee River" and "Annie Laurie." Connie's embarrassment had vanished and her clear voice rang in sweet harmony with the deeper tones of the men.

At the conclusion of "Home Sweet Home," old John Hillier blew his nose vigorously and surreptitiously dabbed the big red handkerchief to his eyes.

(To Be Continued.)

What the world needs is a telephone bell that will tell who is ringing at the other end.

Will Not Leave Cities

Specialists in Russia Prefer Unemployment to Working in Small Towns

Ten thousand technical specialists are listed among unemployed by the Soviet Labor Bureau at the same time that the country is struggling with the problem of insufficient technical personnel.

This apparent contradiction is explained by the circumstances that the unemployed specialists are in Moscow, Leningrad, Kharkov, and other large cities, while the unutilized jobs are in the coal fields of the Donetz Basin, in the oil fields of the Caucasus and other even more unattractive provincial places.

The Labor Bureau in Leningrad alone lists 1,800 unemployed specialists; Moscow has at least as many and other cities show corresponding figures. The majority of these unemployed are young graduates of the technical schools, who apparently prefer privation in the city to a job and a regular salary in the province.

Three-quarters of the new graduates, a Soviet newspaper points out, refuse to accept positions away from the cultural advantages of the urban centres. Higher wages and other inducements do little to overcome their distaste for life in the country.

In addition to these registered unemployed, there are doubtless hundreds more who have not placed their names on the list of the jobless, having accepted positions as office workers or store clerks rather than leave the urban life.

It is generally known that a similar situation exists in relation to physicians. While villages and provincial towns beg and clamor for doctors, thousands of them—especially young ones—are looking for work in Moscow, Leningrad, etc.

Next Imperial Conference

No Arrangements Have Yet Been Made For Any Meeting in 1929

In reference to a statement that the Australian government has urged that an imperial conference be held in 1929, Reuter's Agency learned there has never been any fixed date for the conference. So far no arrangements have been made for any meeting next autumn, and in view of the British general elections being held next summer it is improbable an imperial conference will be held. The last imperial conference was held in 1926.

Little Helps For This Week

"She hath done what she could."—Mark xiv. 8.

And rank for her meant duty, various. Yet equal in its worth, done worthily; Command was service, humblest service done By willing and discerning souls was glory.

—George Eliot.

This Bethany loyalty is the simple requirement of religion. Not one cent, not one moment, not one loving impulse, not one thought, not one syllable of a creed, more than comes within the range of your possibilities, is expected; but all of this is expected, nothing less will do. God asks for no more, but all this does expect and man has no right to evade it. Let duty be its own reward, love its own justification. "She hath done what she could,"—this is the fulness of the Christian excellence; it is the ultimate standard of life.

—Jenkins Lloyd Jones.

CONSTIPATED CHILDREN

Constipation is one of the most common ailments of childhood and the child suffering from it positively cannot thrive. To keep the little one well the bowels must be kept regular and the stomach sweet. To do this nothing can equal Baby's Own Tablets. They are a mild but thorough laxative; are pleasant to take and can be given to the newborn babe with perfect safety. Thousands of mothers use no other medicine for their little ones but Baby's Own Tablets. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Mother—You mustn't eat ice cream like that. I know a boy who ate his ice cream so fast that he died before he had eaten half.

Little Willie—What happened to the other half?

Dragged Down By Asthma.—The man who is continually subject to asthma is unfitted for his or her life's work. Strength departs and energy is taken away until life becomes a dreary existence. And yet this is needless. Dr. J. D. Kellogg's Asthma Remedy has brought a great change to an army of sufferers. It relieves the restricted air tubes and guards against future trouble. Try it.

Fish seem to need more food in warm weather than in cold, experiments indicate.

Nervous and Run Down
The Least Noise
Would Bother Her

Mrs. R. Burton, Oshawa, Ont., writes:—"Three years ago I was so nervous and run down I could hardly bear to have the children make a noise it would bother me so."

A friend advised me to take

and after taking two boxes I began to feel stronger, looked better, and the color came back into my cheeks, and now I am feeling fine again."

IT PAYS TO PAY CASH.

John Eberhardt and wife motored down from Edson to Stony, for the Christmas festivities.

Mr Wm Comisarow spent the holiday with friends in Edmonton.

Mr and Mrs Lefebvre, of Ledue, are visiting this week with Mr and Mrs D Rivest.

Again the schoolboy outgrows his clothes. Publishing circles report the expenditure by the Family Herald and Weekly Star of close upon half a million dollars for huge new printing presses to cope with their last-growing subscription list. At their new low subscription rates of three years for \$2, one is prompted to ask "How long before they outgrow this one?"

The annual meeting and election of officers of Stony Plain U.F. Local will be held on Saturday next at 3 p.m.

The entertainment at Rosenthal Schoolhouse last week was a very delightful affair. The songs, dialogs and recitations by the pupils were appreciated by an audience that filled the building, and many encores were called for. The dance which followed was well attended.

You're Next!

Whisker-growers, bobbers and others requiring tonsorial attention, at times, were pleased to note that an up-to-date barber parlor had been opened in Stony Plain on Saturday last. The new proprietor is a graduate of a first-class College in Edmonton, and has taken a post-graduate course in shampooing, boncelli, etc. Those who take a personal pride in their appearance make no mistake in paying the new Professor a visit, on Main Street next the Farmers' Meat Market.

United Church Notes.

A very well attended and successful Christmas service was held on Sunday evening last. The choir sang a special anthem and Mr Yeats sang a very fine solo. The Pastor gave, instead of the regular sermon, a reading entitled "The Mansion," by Henry van Dyke. Rev O H Reppert was present, and ably assisted in the service.

Next Sunday evening the service will be equally interesting and important. So start the new year in the best way by being in your place at church.

The Sunday school expects to put on the annual Xmas treat soon.

DECEMBER—
28—Town Band's Whist Drive.
31—Grand U.F.A. Ball at Holborn Hall.
JANUARY—
2—Meeting of Ladies Aid of the United Church.
5—Annual meeting of the Stony Plain U.F.A. Local.
21—Daisy Pool Convention in Edmonton.
22—U. F. A. Convention;
24—Alberta Legislative Assembly meets.

George J. Bryan, B.A., LL.B.

Mr George J. Bryan, who has taken over the law practice of the late F. W. Lundy, is a graduate of the University of Alberta, holding the degrees of Bachelor of Arts and Bachelor of Laws. He is also holder of the Chief Justice's gold medal in law.

During his University career Mr Bryan was chief justice of the students' court, and was leader of the debating team that met the team from Oxford led by Malcolm McDonald, son of the ex-premier of Great Britain.

Since graduating, Mr Bryan has practiced law in the city of Edmonton for the past three years with the firm of Van Allen, Simpson & Co.

Mr Bryan is not unknown to the people of Stony Plain, he having taught for some time at Rosenthal school before entering the University. He has also campaigned throughout the district on behalf of the Hon. Chas. Stewart, and is now president of the Young Liberals of the City of Edmonton.

News of the B. G. Hunters

Local big game hunters could have made a reputation for themselves on Saturday morning last by bagging the moose reported to be prowling about the northern part of town.

About 8.32½ a.m. an old hunter named Fitzwilliam dashed across Outway av. and galloped up Main St., and by the time he reached the P. O. corner had just enough breath left to announce the presence of a bull moose on the old Park site.

Fitz is inventing a new steam shovel, and was up to the old auto graveyard looking for parts he required for his invention, when the bull moose attacked him, so he says, horns down.

Fritz claims his first jump was 12 ft., the balance of the mile being done in 10-nothing; on looking round he says he noticed the moose had a pink tail, but Fritz isn't sure on this point.

Henry Barber headed a party to investigate, but the only animal seen was Mike's cow. The affair is puzzling the local hunters, but some think maybe Fritz run across a cache of horn's special, and took a sample.
